

The Federal Communications Commission

Dear The Federal Communications Commission,

As I do understand the financial situation our country is in, new taxes and fees are a way of life. However, they also need to be fair. I believe this proposed change is unfair to "the little people", the ones who work the hardest for the least.

Please reconsider what this proposed change would do to make it even more difficult for students, elderly and low income people to keep phone service.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

L Thompson
